

A tender is not a PDF. It is a *decision system* hidden inside a document bundle.

Deterministic, auditable procurement intelligence for the teams that bid and the committees that evaluate. Every verdict linked to a clause and a page.

THE PLATFORM · TWO VOLUMES, ONE EVIDENCE ENGINE

VOL. I · BIDDER-SIDE

KRISEVA TAS

KRISEVA TAS helps bid teams discover, parse, score, and review tender opportunities. A scattered bundle becomes a defensible BID / REVIEW / SKIP decision. Recommendation only; the operator signs.

THE BUNDLE, TREATED AS ONE DECISION ARTIFACT

BID · MAIN DOCUMENT	SPEC · SPECIFICATION	BOQ · BILL OF QUANTITIES	ATC · ADDITIONAL T&C
CORR · CORRIGENDA	ANN · ANNEXURES · AUTH-GATED	DRW · DRAWINGS · AUTH-GATED	

THREE OUTCOMES · ONE GRAMMAR · REVIEWABLE

BID local bundle ready · timeline feasible · evidence in place	REVIEW something is missing or ambiguous · the operator decides	SKIP category mismatch or disqualifier · with the clause cited
--	---	--

THE VERDICT MODEL · SIX STATES, NONE SILENT

VERIFIED	QUALIFIED	REQ-DEMO	INSUFFICIENT → human	MISSING → human	FAILED never silent
----------	-----------	----------	-------------------------	--------------------	------------------------

THE BOUNDARY · SOVEREIGN-BY-DESIGN

Designed for local-first tender processing, with local database, local file storage, and local model routes where configured. A hash-chained, append-only audit log: a single edited verdict breaks the chain; tamper is visible. Refused at the architecture: cloud LLM APIs, hosted vector databases, SaaS telemetry, foreign-hosted inference, document contents leaving the network.

FIELD NOTES · FROM DISCOVERY

In six discovery interviews (2026), operators reported that the large majority of published tenders were irrelevant to them, and that working through one bid still meant a hundred or more pages, by hand. Six interviews: a field observation, not a market statistic.

VOL. II · ISSUER-SIDE

KRISEVA EVALUATOR

Kriseva Evaluator is an issuer-side, committee-assist bid evaluation system for government and defence procurement organisations. Three-path convergence reasoning on every criterion; uncertainty routes to humans.

FIELD RECORD · STATUS-LABELLED

Pan IIT “AI for Bharat” Grand Finalist, from 13,500+ teams	VALIDATED
Udyam-registered MSME, on government record	ON RECORD
DPIIT Startup-India recognition	IN PROCESS
Incubated at IIT Gandhinagar · IIEC	ON RECORD
In active evaluation with a central armed police force	IN EVALUATION
